

Aside from the fact that is really easy to understand how monarch mind control works based on some really intense research that I did over the past couple of years trying to understand the complexities of how this program works and thanks to whatever information I was able to scoop up on the internet about the subject couple that with some basic research done on things like physics, biology, chemistry, neurology and sociology to figure out the complexities behind such secretive programs that exist under the hierarchy. Most people don't realize this but psychics and psychic channeling is the one thing that is used to for monarch mind control operations to work they way they do and they come in variety of different flavors.

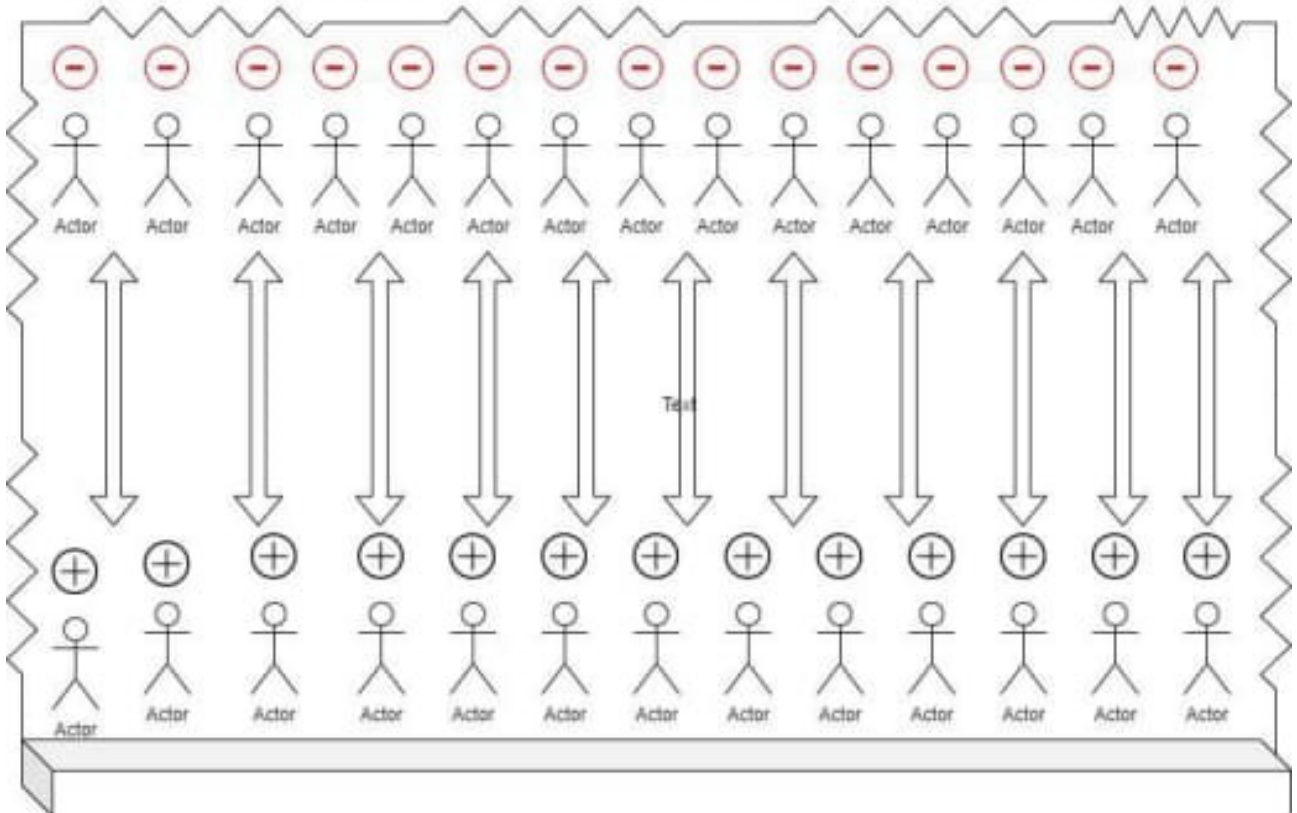

Then thing to remember is that things like distributed denial of service attacks can be used to facilitate mind control on anybody in the vicinity on one of these attacks where the biological energies of the attacker touching the computer and the attacker using it to channel an electromagnetic burst of energy from his location to the attack location means that not only is the computer channeling an artificial electromagnetic burst of energy but it is also carrying the bio electric signature of the attackers body which has his or her blood vibrations, genetic vibrations and chromosome vibrations in that and if the biology of the victim on the other end has similar biology of the attacker then chances are the victim would become a mind control slave to the attacker especially if there doing intoxicants like marijuana, synthetic designer drugs and psychedelics just like the attacker could possibly be doing too means that given the variables that are constant as mentioned above. This means that the victim becomes a proxy agent for the attacker and whatever he or she is biologically connected to via his or her brain, body and soul. Let's be clear on something this could happen to anyone by any number of people at anytime and I am convinced that anyone who has a wiretap on the internet or cellphone from the authorities means that there subjugated to mind control the minute there wiretapped and the biological energies that channel through the internet or cellphone from the wiretap location where all the employees energies collectively channel into the internet or cellphone of the person being wiretapped and if there doing any type of intoxicants just as the employees on the other end of the wiretap means that they become proxy agents and mind control slaves which robs them of there independence. But then just remember that the biological energies of the ISP and telecommunications provider also channels out internet or cellphone too at the same time as well which means that the person on the other end isn't just influenced by employees with the government but the corporate world at the exact same time.

Then when it comes directed energy attacks and electrical surge attacks the same principle applies when it comes to distributed denial service attacks where the electromagnetic burst of electricity channels in the biological energies of the attackers behind those attacks and fills the room up with there energies where it can influence the people in a room on the condition that biology of the attacker matches the biology of the victims on the same basis. Then the backscatter effect that people hear where they might think it's voices in there head when it's the vocal vibrations lingering in the air from the electromagnetism that carries biological energies and signals that are projected from the human bodies of others means that there really isn't such a thing as mental illness it's just people that hear the vocal vibrations of others that have the opposite biological attributes from each other. So for example people of color can hear the vocal vibrations of white people from external surfaces in a room on the condition that the third eye is open and voice to skull effect is active in that room it's designed to give people the impression that there crazy or that in some cases there hearing god when it is just vibrations of humanity lingering in the air via the electromagnetism carrying human biological energies and vocal vibrations or signals from the human body. This kind of thing creates wars that are endless, domestic conflict, terrorist attacks and lines the pockets of the rich via there military industrial complex and big pharma etc.

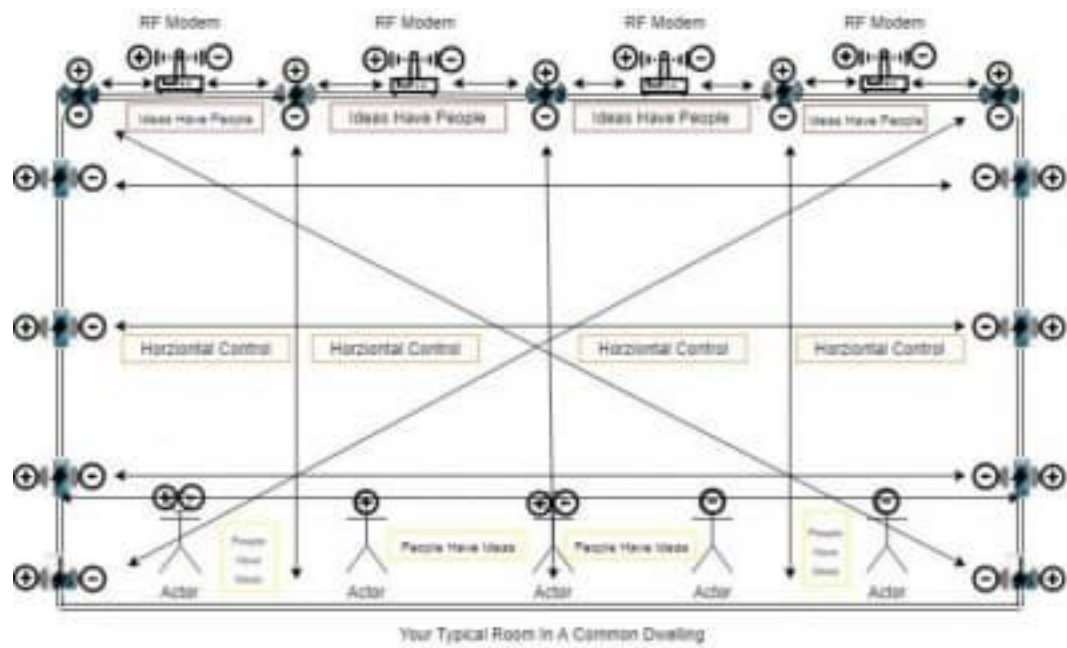

If Your A Negative Blooded Person Chances Are The Bodily Energies Of Positive Blooded People Will Get Dumped Onto To Your Body and Then You Get Stuck Dealing With The After Effects Of That Attack Which Can Leave You Crippled or Mentally Unbalanced.

Rh Negative Blooded People With A, B, O and AB Negative Blood Can Feed There Vibrations Into Rh A, B, O and AB Positive Blooded People

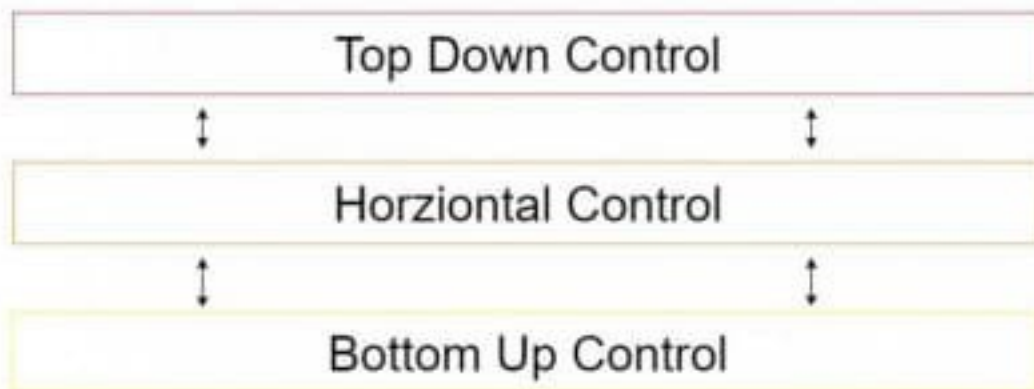

If Your A Positive Blooded Person Chances Are The Bodily Energies Of Positive Blooded People Will Get Dumped Onto To Your Body and Then You Get Stuck Dealing With The After Effects Of That Attack Which Can Leave You Crippled or Mentally Unbalanced.

The Skinner Box

Bodily Energies Can Distribute Out Things Like Smartphones That Carry With Through The EMF Distribution Effect
 Bodily Energies From The Rest Of General Public That Can Cause Behavioral Problems In People That Have Been
 Exposed To Those Energies Through DDOS Attacks On The Smartphone.

Then The Cellphone Towers Connected To Your Smartphone Can Network and Port Bodily Energies Into Smartphone From The Towers Connected To It.

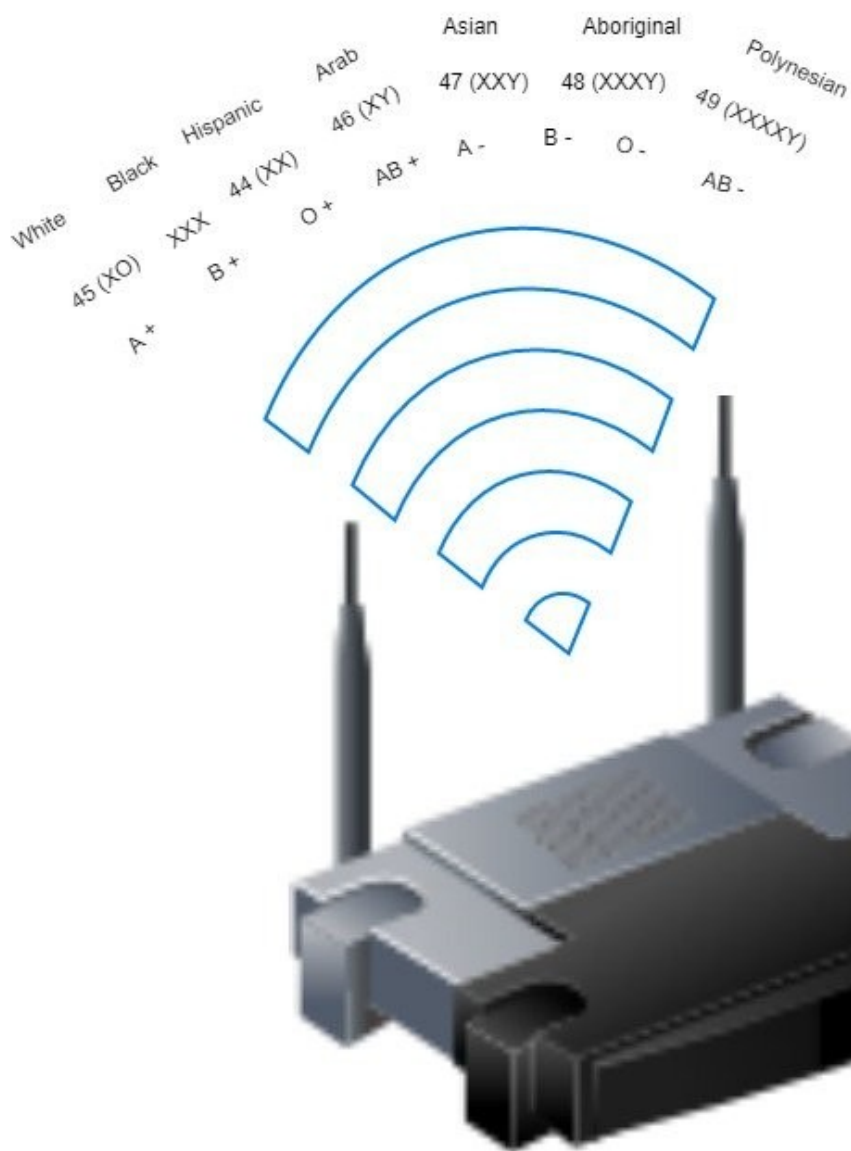

Because The Human Body Naturally Project Bodily Energies Out The Skin Pores Means That Computer or Smartphone Will Network and Port Those Bodily Energies Into The Telecommunications Networks All Over The Planet.

Then Another Thing To Consider To Is That Drugs Will Act Like A Subnet Tool Networking and Porting Bodily Energies On Specific Level To You or Someone You Know On The Condition That They or You Does The Same Drug For That Specific Reason.

Then Another Thing To Consider To Is That Drugs Will Act Like A Subnet Tool Networking and Porting Bodily Energies On Specific Level To You or Someone You Know On The Condition That They or You Does The Same Drug For That Specific Reason.

As Much As You Think These Look Innocent and Harmless There Not Very Harmless or Innocent Looking Because You Can't See Physiological, Genealogical, Biological and Neurological Attributions With The Naked Eye. You Can Technically But Psychiatry Would Call This Hallucinations Or What I Know As Energy Avatars.

The Internet Itself Acts Like A Highway For Imphysical Bodily Energies Where People's Bodily Energies Can Network and Port Through The Internet. Then The Wireless Devices On The Other End Can Distribute Those Imphysical Bodily Energies and They Can Manifest Into Room and Then The Energies Can Either Speak To The Person In The Room and Possess There Body Etc.
